

Description

Clear UV curable high modulus matrix material used for tight buffer and compact fibre units. Usable as single and outer coating.

Benefits

- ✓ Excellent strippability in combination with 830/801 as inner coating
- ✓ Especially designed for compact fibre units with high fibre count
- ✓ High stiffness and good elongation
- ✓ Coloured versions available for tight buffer application

Physical Data

Viscosity 1900 - 2300 mPas
DIN 53019-1 cone/plate at 30°C

Density 1,04 - 1,14 g/cm³
ISO 2811-1 at 23°C

Typical Technical Data (DIN EN ISO 527-1)

Secant modulus at 2.5 % strain* 1100 MPa

Elongation* 20%

Tensile strength* 25 MPa

* Clear films cured under nitrogen with thickness of 80 µm and 1000 mJ/cm²

Instruction

Preparation Gentle stirring before use is recommended

Curing High-pressure mercury vapour lamps or fusion bulbs including nitrogen purge

Process speed Up to 1000 m/min
(corresponding to fil thickness and type of machinery)

Cleaning HERKULA special cleaning agent 35014

Information

Shelf life: One year in a well closed bucket (5° to 30°C) protected from light

Standard packaging: 10 kg

Observe your Material Safety Data Sheet as well as the instructions on the label

Contains no VOC

Temperature Viscosity Curve

Dose Modulus Curve**

** The dose modulus curve describes the influence of the UV dose on the stiffness of the material.

This technical information was made to the best of our knowledge after conscientious studies of all technical facts. Since specific application and handling of the products in the customer's plant are beyond our control, this company refuses in every respect the responsibility for injury and damage to man and material which may result from the use, stocking and application of our products. We emphasise that all our products are for industrial use only.
